

“

The values of Open Source Software : sharing, co-working and dissemination thanks to the standards and the economic model. These are the values which make the assets of Open Source Software's answer to customers' needs.

”

### What we are : Open Source Software Assembler

Altic is a French assembler specialized in Open Source Software. Since 2004 Altic is studying the Free Software market of Business Intelligence, web portal and e-Commerce and selects for its customer the best solutions.

“Our belief is that Open Source Software allows our customers to focus on the true assets of a good Information System : to have a technological solution that answer the specific needs of their business and activities.” Marc Sallières, Altic CEO

Its role is to help company figures which are the best solutions that meet their needs as well as assemble the various applications of their information system and transfer Altic knowledge to their teams.

Altic attaches great importance to applied research in the Open Source field. Thereby it takes part in big European projects, like Ossmose, an Open Source Software Platform for Medium and Small Enterprises labeled by Cap Digital. We work on this project with 5 others companies : Bearstech, Core-techs, eXoplatform, Talend and the French research lab Lip6.

### Who we are working with: Altic Partners

Altic believes that one of the main strength of the companies working in the Open Source World lies in their ability to work together.

Since 2004, through information sharing and common experiences, ALTIC was able to build an ecosystem both on the technical side and the business side.

ALTIC maintains very strong relations with Open Source Publishers: Engineering, eXoPlatform, JasperSoft, Jedox, talend, Varien Service providers for Open source Software: Anaska, Audessa, BearsTech, Core-Techs, eNovance, Proformatique

**Associations :** ADULLACT, APRIL Entreprise, La Cantine, the French cluster Cap DIGITAL, CoterClub, OpenDay, OW2, Silicon Sentier
